PROJECTS

Design System Sid. | 2/2023 – 5/2023 | [GitHub](#) | [Visit Site](#)

A design system that takes a scaled back approach, and focuses on UI design and front-end development.

- Developed a design system with a UI-focused approach using React.js and CSS
- Created a cohesive user interface to enhance the user experience and simplified navigation for reduced friction

Nútímasafn | 3/2023 – 7/2023 | [GitHub](#) | [Visit Site](#)

This modern museum website is a captivating digital portal offering interactive multimedia, and seamless navigation.

- Designed and built a captivating modern museum website using React.js, JavaScript, and CSS
- Focused on UI/UX design and development to showcase interactive multimedia and seamless navigation
- Implemented an intuitive, easy-to-use navigation bar for effortless information finding and page transitions

Rudy | 12/2022 – 2/2023 | [GitHub](#) | [Demo](#)

A design system developed to facilitate the usage of reusable components for novice developers to easily implement.

- Developed a design system with reusable components for novice developers using React.js, JavaScript, Ruby on Rails, and CSS
- Adapted functional log-in/log-out features to address session management and optimize site performance
- Established design system usage rules and best practices for ease of implementation

EXPERIENCE

Danger Press – Production Lead, Atlanta, GA | 3/2019 – 08/2022
